MS Cure Fund debuts new DVD

Pharmaceutical exhibitors provide
resources and MS Patients Advocates

**RSVP
MSCureFund.org (617) 375-9900**

Strength and Hope for MS

hosted by

Ann Romney, MS Patient

She was the First Lady of Massachusetts, wife, mother, grandmother and was diagnosed with Multiple Sclerosis in 1998. She is an avid Equestrian (dressage) crediting her renewed involvement while in Utah for much of her recovery after her diagnosis. Currently she uses a mixture of mainstream and alternative treatments which has given her a lifestyle mostly without limitations.

featured speakers

Howard Weiner, M.D.

Director of Partners MS Center at Brigham and Women's Hospital and Co-Director of the Center for Neurologic Diseases. He is a world renowned MS research doctor and is highly regarded in his field amongst his peers as the fore father of research. Dr. Weiner has been on the cutting edge of developing new therapies for more than thirty years and author of, "Curing MS".

Philip De Jager, M.D. Ph.D.

He is one of the neurologists at the Partners MS Center and is an assistant professor at Harvard Medical School and the Brigham & Women's Hospital. He leads the Laboratory of Neurogenetics and Computational Neurology at the Harvard/Partners Center for Genetics & Genomics. The focus of his research is understanding the genetic architecture of MS and developing new tools with which to diagnose MS and predict a patient's disease course.

Lynn Stazzone, RN, MSN, NP

She received her MSN in neurological rehabilitation from BU, and a certificate of advanced study in primary care from MGH. Her clinical interests are in multiple sclerosis, and her primary care concerns are in the neuro-rehabilitation continuum.
